

# **A Data-Driven Strategy for Health Resource Management**

*An analysis of the surge of Covid and Influenza in Tennessee and its neighboring states*

***A Microsoft Community Project***

## Meet the Team

### Eunice Ashalley Business Analyst

- Graduate Student - MIS 2026
- Gain from this project: Hands on experience with Power BI and Copilot to analyze data and generate valuable insights

### Aba Okyere Data Strategy Lead

- Graduate Student - MIS 2025
- Gain from this project: Using Power BI in story telling, analyzing data and interpreting it for business decision making

### Kristina Mwangeka BI Developer

- Graduate Student - MIS 2025
- Gain from this project: Create visuals in Power BI that answer the questions management ask, Exchange of Ideas with my peers improved my data story telling skills

## **Dataset**

- Sourced from [Kaggle](#)
- Number of rows used: 8191
- Number of features used: 19
- Our records were derived by filtering TN & neighboring states (KY, MS, AK, MO, GA, AL, NC)
- Key features used: Covid & Influenza admission rates, Age categories, Collection Date

## ***Problem***

When respiratory surges hit, health centers are overwhelmed and staff burnout is experienced.

## ***Solution***

Using Power BI analytics to:

- . Determine peak seasons
- . Allocate resources such as type of nurses, bed capacity, advanced technology & supplies.

# **From Reactive to Proactive:**

## **A Data-Driven Strategy for Health Resource Management**

### ***Key Questions***

1. What is the infection rate of our neighboring states ?
2. Which nursing department do we need?
3. What is the seasonal trend for Covid and Influenza?
4. What is the emergency plan in place to handle employee shortages?

Q1: What is the infection rate of our neighboring states

Year

2020

2021

2022

2023

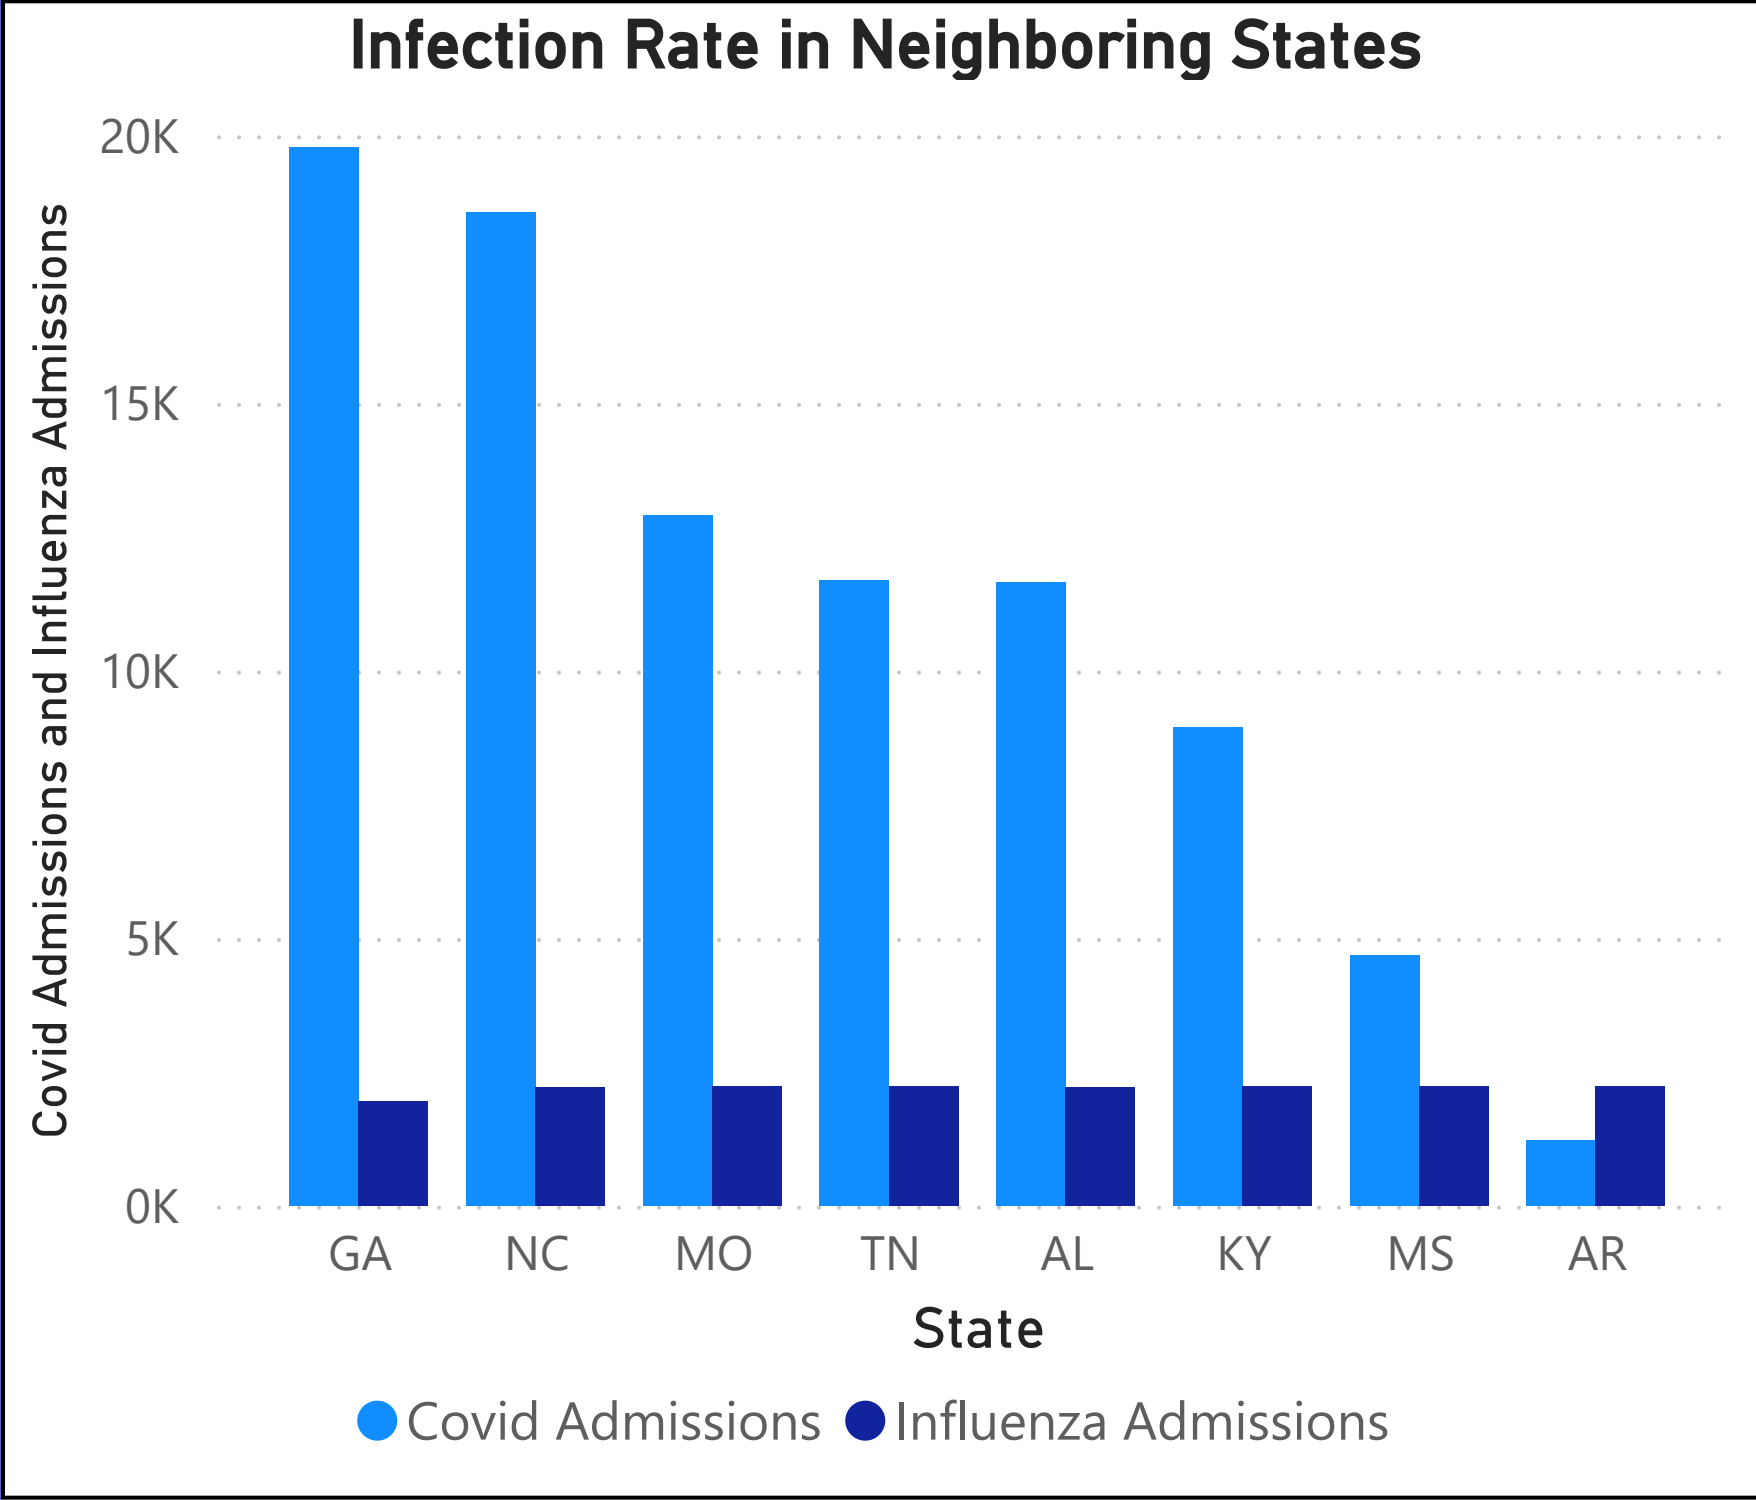

Date

2/5/2023

10/14/2023

Q2: Which nursing department do we need?

Q3: What is the seasonal trend for Covid and Influenza?

#### Q4. What is the emergency plan in place to handle employee shortages

##### **Emergency Actions - Low**

- . Offer voluntary overtime with fatigue safeguards.

##### **Emergency Actions - Mild**

- . Redeploy staff from elective or ambulatory areas.
- . Engage pre-contracted agencies

##### **Emergency Actions - Critical**

- . Assign a contingency incident command staffing team with roles.
- . Adjust nurse-patient ratios in non-critical units while maintaining ICU units.

A blue brushstroke graphic with the text "Q&A" in white. The brushstroke is irregular and textured, resembling a paintbrush application. The text "Q&A" is centered within the blue shape. The entire graphic is set against a white background, which is itself centered on a larger blue background.
